Dr. Wright B. Langham  
Biomedical Research Group  
Los Alamos Scientific Laboratory  
Los Alamos, New Mexico 87544

Dear Wright,

Here are copies of the current status report on the Pu-injected people and a list of what I was able to accomplish on my recent trip to Rochester. It may prove difficult to obtain permission from the IEM people in Washington and equally difficult to persuade Dr. Born that the Pu people should be followed at all or in Berkeley. I propose to just keep plugging away at it. Dr. Waterhouse is of the opinion that there is some urgency about contacting the three known survivors. We are likely to lose them any time. Winter in Rochester is an especially hostile time for infirm oldsters. I hope resolution of the policy questions does not take too long.

Have a good holiday, and I expect I will be ~~beginning~~ you or talking to you about all this before too long.

Sincerely,

Patricia W. Durbin
